Job Start Income Code

A new income code, **JS**, will be placed in production October 1. This code identifies income earned from a Job Start position. The JS code will exempt the earnings for the Temporary Assistance program but count the income for all other programs.

Please use the new **JS** code when setting up Job Start positions for the benefit month of October and beyond. Please convert existing Job Start positions to the new income code as you encounter them through client contact or working reported changes.
